Sunny walks with beautiful views

Mariaberget - Skinnarviksberget

A walk along this "mountain" on northern Södermalm gives you a spectacular view of almost the entire inner city. It is a short but beautiful stretch that impresses most visitors thanks to its postcard-beautiful views and picturesque architecture.

Riddarfjärden around

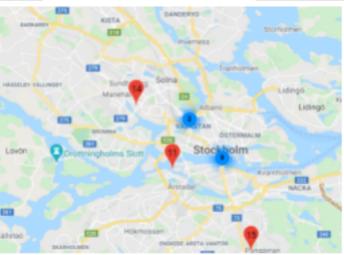

This round is best suited during the winter because it is completely without shade. A smart choice when half the year is spent chasing the sun's rays, that is. The trick to getting the most out of a walk around Riddarholmen is to be up early and choose a clear day. I usually start in Hornstull because I lived there before, but you can actually start anywhere along Riddarfjärden. If you start from Hornstull, there are plenty of cafés to buy a coffee from. Aim for the Västerbron and be prepared for a view (and occasionally even wind) that will take your breath away. that will take your breath away.
